Chief Administrative Officers, Chief Financial Officers, Chief Information Officers, IT and Cybersecurity professionals, Public Information Officers, Police, Risk Managers, Emergency Response and Incident Management Teams, Legal and Compliance Teams, Insurance Staff, Infrastructure & Building Services Managers, and any municipal staff with access to sensitive data.

Registration Cost

FREE but registration is required (see link below)

Cyber Resilience for Municipalities: Safeguarding Critical Infrastructure - Municipal Cyber Attack Simulation

Cyber attacks can happen in the blink of an eye and cause devastating consequences for municipalities. Public infrastructure, operations and municipal operated entities, are targeted by sophisticated criminals using customized cyber threats that aim to disrupt essential services. These attacks can cause long-term outages, financial losses, erosion of public trust and compromise Business Continuity Plan & Disaster Recovery (BCP&DR) standards.

Through a live simulated cyber-attack, this webinar will highlight the extent to which cyber-attacks can disrupt municipalities and demonstrate the pressing need for comprehensive cybersecurity strategies, advanced threat detection, and robust incident response plans designed to shield digital infrastructure.

Register now for this valuable insight on securing sensitive data, elevating compliance measures, and ensuring a resilient digital future.

About the speakers

Peter Daher
Managing Partner
Optimus Tech Solutions

Peter Daher is the Managing Partner at Optimus Tech Solutions (OTS), an award winning, leading Managed Services IT company that specializes in cybersecurity. With nearly 30 years in the IT industry, Peter is passionate about delivering high quality, innovative, and reliable solutions to various industries, municipal governments, and broader public sector clients across Canada. He is a respected authority in the Canadian cybersecurity community, offering expertise in cloud security, ransomware, threat intelligence and attends board and municipal council meetings on behalf of clients acting as their CIO. Peter also collaborates with clients to strengthen their security measures by implementing a reliable 24x7x365 security service.

Jatinder Mann
Principal Enterprise Architect
Optimus Tech Solutions

Jatinder Mann is a highly experienced Principal Enterprise Architect with an outstanding 22-year reputation in the field, serving public sector, BIG4 and Fortune 100 companies. Specializing in Microsoft Cloud solutions, particularly Office 365 and advanced Azure offerings, Jatinder is a valuable asset across both cloud-based and on-premise environments. With a strong focus on cybersecurity and safeguarding critical infrastructure, Jatinder is the go-to expert in this field and is a key leader with our municipal based clients.

Philip Tetlow
Head of Relationship Management
Industries and Government Practice
Optimus SBR

As Head of Relationship Management in the Industries and Government Practice, Philip works with new and existing clients and the Optimus SBR client delivery teams to drive value for clients. Leveraging his long track record working with municipalities, Philip also worked in a national leadership capacity with a big four consulting firm, ran his own consulting practice and also spent a decade in the Canadian banking sector. Philip will be the main contact for any follow up or questions that may arise from this webinar.
